NEW ROSES

Dear Friends:

Never before in our 35 years of rose growing have we received as many letters from you in which you comment so favorably on the bushes which you purchased last year and on their excellent performance in your gardens. It is gratifying to know that our efforts to raise quality roses have given you so much pleasure and we should like to express our appreciation to you for your thoughtfulness in writing to us.

This year we are listing twelve new varieties for your consideration. We hope that you will find several among them and from the regular listing that will fit into some niche of your garden. Please order early so that we may be able to fill your requests completely.

Sincerely,

WAR DANCE

FOR 1962

JOHN ARMSTRONG (*Swim-Armstrong*) \$3.50 ea., 3 for \$9.30

Deep velvety flowers of heavy substance that hold their color well and do not blue under ordinary sun make this a desirable rose for your gardening pleasure. Blooms are of medium size, about four inches, and are borne singly and in clusters on stems that are long enough for cutting and arranging. Keeps well as a cut flower and holds its color and form. Plants are vigorous, bushy, and have excellent foliage. Plant Pat. 2056.

KING'S RANSOM (*Morey '61*)

Illustrated back cover.

\$3.50 each, 3 for \$9.30

We welcome the addition of this fine yellow rose to its fellow AARS winners. Here at last is an excellent rich chrome yellow rose of good petalage and fine form that holds its color and does not fade. Flowers are five to six inches across, high centered, perfectly symmetrical, borne on sturdy stems, and have excellent deep green glossy foliage. Plants are tall, shapely, with dense foliage to the ground. Tops as a yellow rose. Plant Pat. R.R.

MEMORIAM (*Von Abrams '61*)

\$3.50 each, 3 for \$9.30

Soft creamy-pink to white buds and blooms, long classic buds and high-centered flowers, and deep green semi-glossy foliage combine to make MEMORIAM a top exhibition and garden rose. The 50 to 60 crisp velvety petals make a large double bloom that is five to six inches in diameter and borne on long, stiff stems. Slightly fragrant. Plant Pat. R.R.

WAR DANCE (*Swim '61*)

\$3.00 each, 3 for \$7.95

Here is a grandiflora with a deep orangish-scarlet color that is as virile as a WAR DANCE. The 28-40 petaled blooms are four to five inches across, high centered, borne singly and in clusters on a densely-foliaged, heavy-caned plant. At its attractive best in the half blown and fully opened flower. Plant Pat. 2017.

GOLDEN SLIPPERS (*Von Abrams '61*) \$2.50 ea., 3 for \$6.60

This luxuriously gay floribunda will have you tripping lightly over cloud banks. The bright gold buds, flushed red, open to fluorescent orange-vermilion blooms with a glowing golden base—a delightful contrast. Flowers drop cleanly and rebloom is quick. Foliage is a bright green with bronze tinges. Excellent for beds, borders, or accent plants. Plant Pat. R.R.

HAWAII

CHRISTIAN DIOR

(*Meilland '61*) Ill. front cover

\$3.50 each; 3 for \$9.30

Each bloom of Christian Dior is a bright pinwheel of scarlet and crimson. Its rich crimson-red color, overlaid with iridescent scarlet, becomes even more vivacious under artificial light. Dior is one of the best roses for keeping quality as a cut flower and does not blue in the garden or in the vase. The medium large, pointed bud, opens to a large high centered bloom of 60 petals that is ideal for arrangements. Plants are vigorous, tall, upright (and we feel that the quality and size of the bloom increases with the age of the plant). A rose you will enjoy growing and cutting. Plant Pat. 1943.

HAWAII (*Boerner '59*)

CLIMBING ROSES

CL. CIRCUS

Climbers are ideal for a large splash of color on a trellis, a wall, or for covering a fence. Many of them will give you repeat bloom throughout the summer and fall, but nothing like the heavy spring bloom. Ordinarily climbers do not bloom the first year as the blossoms are borne on wood that is two years old. Cutting the dead blossoms off and leaving three or four leaves, as you do on bush roses, will aid in giving better repeat bloom. Climbers should not be pruned the first year in the garden. Pruning may start the second or third year and consists of removing several of the older and woodier canes. You will get more bloom if the canes are trained so that they are parallel with the ground.

CL. MRS. SAM MCGREDY

\$1.75 each, 3 for \$4.65

We unhesitatingly recommend this as one of the very finest climbers. Its striking coppery-pink to salmon-pink blooms are produced incessantly throughout the season. The buds open to very full, double flowers of good fragrance. The plants are very vigorous and covered with an abundance of glossy green foliage which is a spectacular reddish-green when young.

CL. PEACE

\$2.50 each, 3 for \$6.60

The golden yellow buds flushed pink at the edges open slowly into large, ruffled blooms of pale yellow to cream with tinges of pink. The plants are as remarkable as the blooms with their strong stems, shining dark green foliage and vigor. Repeat bloom is fine. Plant Pat. 932.

CL. PICTURE

\$2.00 each, 3 for \$5.25

Picture is one of the best pink climbers. It is very prolific in blooming habit and one of the best for repeat bloom. The blossoms are the same high centered specimen type blooms as in the bush. Excellent for cutting. Some mildew. Plant Pat. 524.

CL. BLAZE (Improved)

\$1.75 each, 3 for \$4.65

A spectacular climber that is similar to the popular Paul's Scarlet but is more recurrent in bloom. The cup-shaped blazing scarlet blooms are borne in clusters on a dark, leathery foliaged plant that is generally disease resistant.

A sport of the very attractive bush rose that should make an excellent climber, producing quantities of its rich red flowers that are so fine for cutting. Plant Pat. 1990.

CL. CECILE BRUNNER

A pillar type yellow climber of spectacular color. The medium sized buds are a bright golden yellow, usually borne singly, which lighten when open, giving forth a mild fragrance. The rich green foliage appears to be resistant to the usual rose diseases. The continuous blooming habit through the summer produces quantities of flowers for cutting. Plant Pat. 704.

CL. MERMAID
